Registration and administration:

Dušan Ćirović +381 60 441 9494

Vladimir Jakovljević

Secretary and contact person for competitors:

Dušan Ćirović +381 60 441 9494

Nemanja Perović +381 64 064 9307

The Organizer may refuse to allow entry into the competition or eliminate during the competition any competitor who:

Does not follow the present rules and regulations;

Has an aggressive or unsporting behavior;

Disrupts the running of the competition;

Creates an unpleasant or tense atmosphere;

Does not respect the rules of all properties through which they ride, locals, and the environment in general.

The registration fee and all other fees will not be refunded in case of failure to appear at the competition or in case of any kind of drop-out, abandonment, or elimination from the competition.

All competitors and all the people involved in any way in the organization of the Racing Rocks ATV Rally 2026 are obliged to know and follow the contents of the present rules and regulations.

Not knowing the present rules and regulations does not excuse anybody from responsibility and consequences.

3. Race Format

Racing Rocks ATV Rally 2026 has two categories of difficulty:

Classic Race – for advanced level weekend riders who want to experience a GPS rally race for the first time and practice their skills without the risks, effort and preparation needed for higher level races.

Classic Race is a two day event consisting of:

Stage 1 - Track length is 50km

Stage 2 - Track length is 50km

Crossover Extreme Race – for the most experienced, physically and mentally fit participants with a very high level of mastery in all segments of quad bike riding as well as an adequately prepared vehicle capable of tackling the hardest terrain.

Prologue – Qualification course on a marked track around 2km. Individual timed runs, **the top 3 earn the right to choose their starting position for the first stage!** The remaining riders start according to the prologue results, filling the spots unclaimed by the top 3.

Any rider that fails to complete the prologue will have their prologue time calculated as:

Prologue time = Slowest recorded prologue time + 5 minutes (up to a maximum of 15min)

Stage 1 – Wednesday 14.10.2026. 40km crossover timed GPS race. Riders start in 20 second intervals according to the list established by the prologue event.

Stage 2 – Thursday 15.10.2026. 50km crossover timed GPS race. Riders start in 20 second intervals according to the results from Stage 1 – best time starts first.

Stage 3 – Friday 16.10.2026. 50km crossover timed GPS race. Riders start in 20 second intervals according to the results from Stage 2 – best time starts first.

Stage 4 – Saturday 17.10.2026. 50km crossover timed GPS race. Riders start in 20 second intervals according to the results from Stage 3 – best time starts first.

4. Track marking, GPS and Penalties

Racing Rocks Rally is a GPS navigated race on **unmarked forest tracks**. The daily GPS tracks will be shared with the riders the evening before the race stage. It is forbidden to forward the GPS files to any other individual.

All tracks lead from start to finish and must be followed with a tolerance of 100m.

Certain parts of the track might be marked with tape for safety reasons. Competitors must ride within the marked area.

Each stage will contain several checkpoints, some of which will be marked as tank refueling points.

Riders are obliged to stop at checkpoints to be confirmed and noted by the checkpoint staff.

The Organizer will assign special areas for refueling called **TANK POINTS**.

Refueling is allowed **ONLY** in these areas.

Refueling will be done only with the engine OFF.

Overtaking is strictly forbidden at checkpoints!

The time spent refueling is not deducted from the total race time.

Smoking in the refueling area is forbidden, under penalty of elimination from the race!

Competitors must finish the whole race on the same ATV they started with, no ATV swapping allowed.

Parts of the track may have a speed limit of **30 kph**. The speed limited section will have its beginning and end marked clearly, both on the GPS as well as physically on the track. Penalty for speeding is: 5 minutes for every 10kph above the speed limit.

Overtaking is strictly forbidden on speed limited sections! – Penalty 30min

Leaving the given track tolerance is strictly forbidden and doing so (without returning to the original point of error) will lead to time penalties calculated as:

$$5 \text{ minutes} + (3 \times T_s)$$

where T_s is the slowest time recorded through the part of the track that the penalized competitor has cut. Race Jury reserves the right to apply additional penalties on case to case basis.

Competitors use their own GPS devices (must be declared to the race officials) or their smartphones for GPS Navigation.

Independent of navigation, Racing Rocks Rally uses GPS tracking to track and check your race.

Therefore it is mandatory to install the Racing Tag app on your smartphone and have it properly setup. Help and support for the app setup will be provided through social media, Viber group as well as in person on all rider meetings and briefings. In case of arbitration, current track data from your device may be used if necessary.

Racing Rocks Rally is based on the rule that the shortest time wins. Overall race time is calculated as follows:

Prologue time

+ time of Stage 1
 + time of Stage 2
 + time of Stage 3
 + time of Stage 4
 + time penalties (if any) = Overall time

Each stage has a maximum allowed time of riding, as well as time limits to reach certain checkpoints.

Riders will be informed of these time limits at appropriate rider meetings before every stage start.

In case of an unsuccessful stage finish, rider's time is calculated as:

Time of slowest successful finish of the day + 30min

Failing to finish a stage does not disqualify a rider from the overall standings.

Appeals on penalty decisions are possible only at times scheduled by the Organizer. Deposit for appeals on your own results is 30€. Deposit for appeals on another competitor's results is 60€. Deposit is returned only if the appeal is deemed successful.

5. Safety

During the competition, all competitors are required to wear appropriate protective equipment: off-road helmet, goggles, and boots, chest and back protectors, upper and lower limb protection parts.

Competitors can be disqualified from the race if failing to use adequate safety equipment. **Helmet straps must be properly fastened!**

All competitors are obliged to take all safety measures to prevent their own injury, injury of other competitors, vehicles, public and private property, staff members, spectators, and domestic and wild animals.

When approaching a slower competitor, the faster competitor must make his presence known before overtaking him. It is not the duty of the slower competitor to notice or to make maneuvers in order to allow the faster-approaching competitor to overtake.

In case a competitor notices another injured competitor, he must make sure his safety is not in danger and then immediately inform the Race officials either by using the SOS option of the Racing Tags app or by phone call. If this is not possible, he will notify the nearest staff member. In case this is also not possible, by moving up the race track, he will notify about the incident at the nearest checkpoint.

The time spent assisting another injured competitor(s) will be deducted from the stage racing time. This will be done by the Race director after the notification made by the assisting competitor and confirmed by the injured victim and other witnesses.

The race course may contain sections of public roads where competitors might encounter other road users. When on public roads, competitors must comply with Traffic law and regulations of Republic of Serbia.

Leaving the racetrack is forbidden. The only way to leave the race track is through the checkpoints and then by following instructions given by the staff members.

Competitors under the age of 18 are allowed to participate with the written consent of parents/legal guardians. Parent/ legal guardian must be present at the competition.

In case of extreme weather conditions (strong winds, lightning storms, fog, snow, or heavy rain), the Organizer reserves the right to change the race schedule and/or shorten the track on safety grounds. In very extreme cases, race days can get rescheduled or even canceled.
